

# SCIENTIFIC POSTERS and BCC FLOOR PLANS

## Budapest Congress Centre Floor plan and poster areas

## EXHIBITOR LIST

### 4-D Neuroimaging

Grüner Weg 83  
52070 Aachen  
Germany  
Phone: 49-241-155037

### Booth #26

Fax: 49-241-156912

4-D NEUROIMAGING, headquartered in San Diego, CA, is dedicated to the development of Magnetoencephalography ["MEG"—also known as magnetic source imaging ("MSI")] systems, which utilize superconducting sensors to measure magnetic fields in the human brain and body and assist in the diagnosis of a potentially broad range of medical disorders. Its main product, the Magnes WH system, allows examination of the functioning of the entire brain at once, and is designed for evaluating all patients including those who are critically ill. Additional information about 4-D and its products can be found on its website: [www.4dneuroimaging.com](http://www.4dneuroimaging.com).

### ANT—Advanced Neuro Technology Booth #3

Colosseum 2  
Enschede NL 7521 PT, The Netherlands  
Phone: 31-53-436-5175

Fax: 31-53-430-3795

### Avotec, Inc.

603 NW Buck Hendry Way  
Stuart, FL 34990, USA  
Phone: 1-772-692-0750

### Booth #32

Fax: 1-772-692-0788

Avotec, Inc. manufactures the Silent Vision Visual Systems and Real Eye Imaging Systems for fMRI visual stimulus presentation with XVGA resolution and software control of image orientation, image, RGB balance, and luminosity. Avotec also manufactures the Silent Scan Model SS-3100 Research Audio System for fMRI audio stimulus presentation.

### Brain Innovation B.V.

Universiteitssingel 40 Maastricht  
Limburg 6201 BC, The Netherlands  
Phone: 31-43-3884-064

### Booth #8, 9

Fax: 31-43-3884-271

It's the right time now to switch to BrainVoyager™ QX. As novice or master of brain imaging research, you will be happy to find the "All-In-One" software package for the analysis and visualization of functional and structural MRI data offered by Brain Innovation. Check it out at [www.BrainVoyager.com](http://www.BrainVoyager.com).

### Brain Products GmbH

Stockdorfer str. 54  
Munich 81475, Germany  
Phone: 49-89-744-244-50

### Booth #22, 23

Fax: 49-89-744-244-544

### Compumedics Neuroscan

30-40 Flockhart Street  
Abbotsford Victoria 3067, Australia  
Phone: 61-3-8420-7300

### Booth #16

Fax: 61-3-8420-7399

Compumedics Neuroscan is the world's leading supplier of instruments for brain research. Its products include software and hardware for EEG, ERPs, Source Localization, and Functional Neuroimaging. Compumedics Neuroscan provides

complete solutions for a wide range of Neuroscience applications, including sophisticated tools for the investigation of the central nervous system.

### CTF Systems (2001) Inc.

VSM MedTech  
Suite 15, 1750 McLean Avenue  
Port Coquitlam, BC, V3C 1M9 Canada  
Phone: 1-604-468-5092

### Booth #14

Fax: 1-604-941-8565

CTF MEG systems from VSM MedTech Ltd. offer completely non-invasive functional brain imaging with millimeter/millisecond resolution. CTF systems feature 275 MEG channels; up to 128 simultaneous EEG channels; ultra low-noise sensors; effective environmental noise cancellation; convenient "set-and-forget" tuning; digital control electronics; LINUX based software and many other unique features.

### Electrical Geodesics, Inc.

Suite 307, 1600 Millrace Drive  
Eugene, OR 97403, USA  
Phone: 1-541-687-7962

### Booth #30, 31

Fax: 1-541-687-7943

Electrical Geodesics, Inc. produces dense array (64–256 channels) EEG/ERP acquisition and analysis systems for human complete solutions for a wide range of Neuroscience applications, electrophysiological brain research utilized in cognitive neuroscience, sensory processing, and emerging clinical applications. The rapid (under 10 min), painless application of the Geodesic Sensor Net makes high channel count ERP recording practical for neonates to adults. EGI also is the North American distributor of BESA source localization products. [www.egi.com](http://www.egi.com).

### eldith GmbH

Gustav-Kirchhoff-Str. 5  
D-98693 Ilmenau  
Phone: 49-3677-20-10-420

### Booth #25

Fax: 49-3677-20-10424

The eldith GmbH, founded in 2000, is an innovative enterprise in medical technology. Its main field of business is the development, production, and sale of devices for neurotherapy. eldith's DC-EEG system NEURO PRAX(R) is suitable to measure EEG and other signals (0–1200 Hz at 32 channels) during fMRI.

### Elekta

P.O. Box 7593  
Stockholm 10393, Sweden  
Phone: 46-8-5872-5400

### Booth #4, 5

Fax: 46-8-5872-5500

Elekta is a leading international medical-technology company offering advanced and innovative clinical solutions and services for precision radiation treatment of cancer and minimally invasive treatment of brain disorders. Founded in 1992 and head office in Stockholm, Sweden, the Company has around 1200 employees and net sales amounting to approximately 380MUSD.

**Elsevier****Booth #29**

84 Theobald's Road  
London WC1X8RR, United Kingdom  
Phone: 44-20-7611-4000

Fax: 44-20-7611-4201

Publishers of *NeuroImage*. *NeuroImage* is a vehicle for the communication of the most important and best research which uses imaging and mapping strategies to study the brain's structure, function, and the relationship between the two, from the whole brain to the tissue level. Abstracts to the OHBM Budapest conference are published in a supplement to *NeuroImage*. Visit our stand to find out more about the journal and to pick up your author information pack, as well as viewing our other journals and books.

**GE Healthcare****Booth #6**

3000 N. Grandview  
Waukesha, WI 53188  
Phone: 1-262-548-2223

Fax: 1-262-544-3384

GE Healthcare is a \$10 billion leader in medical imaging, point-of-care systems, healthcare services, and information technology. Its offerings include networking and productivity tools, clinical information systems, patient monitoring systems, anesthesia and respiratory care, maternal–infant care systems, surgery and vascular imaging, conventional and digital X-ray, dental imaging, computed tomography, electron beam tomography, magnetic resonance, ultrasound and bone mineral densitometry, positron emission tomography, nuclear medicine, and a comprehensive portfolio of clinical and business services. For more than 100 years, health care providers worldwide have relied on GE Healthcare for high quality medical technology and productivity solutions. For more information, visit the GE Healthcare Web site at [www.gemedical.com](http://www.gemedical.com).

**Hitachi Medical Systems GmbH****Booth #15**

Kreuzberger Ring 66  
Wiesbaden 65205, Germany  
Phone: 49-611-973-2225

Fax: 49-611-973-2210

Hitachi Medical Corporation, a worldwide Leader in human brain mapping Technology, will display the latest state of the art ETG-4000 Optical Topography System that measures brain activity in real-time, noninvasive, and with less restraint on the patient. The Optical Topography System allows analysis of blood volume changes throughout the brain simultaneously at 24 or 48 points offering a new diagnostic approach of cerebral hemodynamic data measurements.

**Medoc Ltd., Advanced Medical Systems****Booth #17**

P.O. Box 423  
Ramat Yishai 30095, Israel  
Phone: 1-972-4-9830751

Fax: 1-972-4-9830785

Medoc presents the new **CHEPS—Contact Heat Evoked Potential Stimulator**, an advanced thermal stimulator for objective pain-EP measurement and fMRI research. The new CHEPS offers large heating area (27 mm diameter) and enables selective stimulation of A-Delta and C-fibers. For more info: [www.medoc-web.com](http://www.medoc-web.com).

**MEGIS Software GmbH—BESA****Booth #24**

Bahnhofstr. 95  
Graefelfing 82166, Germany  
Phone: 49-89-89-80-99-66

Fax: 49-89-80-99-67

BESA is the most widely used software for source analysis and dipole localization in EEG and MEG research. BESA covers the whole range of signal processing and analysis from the acquired raw data to dynamic source images.

**MRI Devices Europe GmbH****Booth #7**

Schweinfurtersstr. 28  
Würzburg 97076, Germany  
Phone: 49-931-299-2727

Fax: 49-931-299-2710

MRI Device's IFIS-SA™ and Eloquence™ are the first comprehensive, user-friendly solutions for functional MR imaging. The system includes a LCD visual display, crystal clear audio, head stabilization, motor response keypads, and our High-Resolution Head Array coil. The software includes experiment creation, patient management, patient assessment, protocol planning, and behavioral data analysis.

In USA: [info@mridevices.com](mailto:info@mridevices.com)

In Europe: [info@mridevices-e.com](mailto:info@mridevices-e.com)

**Nexstim Ltd.****Booth #28**

Elimäenkatu 22B  
Helsinki FIN-00510, Finland  
Phone: 358-9-2727-1711

Fax: 358-9-2727-1717

Nexstim is the developer of Navigated Brain Stimulation, a new brain scanning modality. eXimia NBS is a unique platform for noninvasive clinical and scientific examinations of neuronal conduction within the brain. The eXimia products feature modern transcranial magnetic stimulation, fast EEG measurement of brain reactions, and precise MR-guided stimulus delivery.

**NIRx, Medical Technologies LLC****Booth #18**

15 Cherry Lane PO Box 134  
Glen Head, NY 11545 USA  
Phone: 1-516-759-7412

Fax: 1-516-759-9510

NIRx, your partner in functional neuroimaging, will highlight its DYNOT Imaging System, the first commercially available dynamic near-infrared optical tomographic imager. This fully integrated, turnkey research instrument offers human or animal imaging heads. Features include multiple system and data integrity checks and a suite of data and image analysis software.

**NordicNeuroLab****Booth #33**

Ibsensgate 104  
Bergen 5052, Norway  
Phone: 47-55388643

Fax: 47-41413423

NordicNeuroLab manufactures and supplies high-quality products for functional imaging. Our product family features a tightly integrated set of software and hardware components that you may use separately or combine together. All of our products have been developed and designed in close cooperation with various research groups and clinical users.

**Oxford University Press****Booth #20**

Great Clarendon Street  
Oxford OX2 6DP, United Kingdom  
Phone: 44-01865-353103

Fax: 44-01865-353835

**Philips Medical Systems****Booths #1, 2**

Veenpluis 4-6  
Best 5680 DA, The Netherlands  
Fax: 31-40-276-3194

Philips Achieva MR systems offer innovative solutions supporting diagnosis and treatment of neurological disease. Philips Achieva 1.5T enables fast, easy investigation of brain and spine morphology, neurovascular imaging, functional imaging, and spectroscopy. Philips Achieva 3.0T delivers ultra-high-field brain and spine imaging, opening new diagnostic frontiers. Philips unique SENSE technique gives unparalleled imaging speed and/or resolution.

**Resonance Technology****Booth #21**

18121 Parthenia Street, Unit A  
Northridge, CA 91325  
Phone: 818-882-1997

Fax: 818-882-5524

In addition to our full line of MRI compatible patient comfort devices, Resonance Technology, Inc. offers our second generation of the first and only truly stereoscopic, XVGA Virtual Reality Display for functional MRI on the market. With unmatched clarity and versatility, VisuaStim XGA—Digital is the perfect choice in visual stimulation displays for fMRI studies. We also have a full line of Audio and Video Systems for patient comfort applications including the new wide-screen Cinema Vision.

**Rogue Research Inc.****Booths #12, 13**

206-4398 boul. St-Laurent  
Montreal, Quebec, Canada H2W 1Z5  
Phone: 1-514-284-3888

Fax: 1-514-284-6750

Rogue Research develops Brainsight(tm) Frameless, an advanced image-guided neuronavigation system for TMS coil localization and nonhuman primate surgical guidance. Brainsight(tm) Frameless allows you to define targets on anatomical and/or functional image data, and to display and guide your tools to the target as seen on the images.

**SensoMotoric Instruments (SMI)****Booth #27**

Warthestraße 21 Teltow/Berlin  
D-14513, Germany  
Phone: 49-3328-3955-12

Fax: 49-3328-3955-99

**Siemens Aktiengesellschaft  
Medical Solutions****Booths #14, 15**

Henkestr. 127  
Erlangen 91052, Germany  
Phone: 49-9131/84-0

Fax: 49-9131/843754

Siemens Medical Solutions: 1.5T to 7T MR Solutions

- Up to 32 RF channels for highest speed and signal in advanced Parallel Acquisition Techniques
- Featuring automated brain slice positioning
- 3D PACE, the unique real-time prospective motion correction
- 3T power with MAGNETOM Allegra and Trio
- Leading expertise at 7T

[www.siemens.com/MAGNETOM-World](http://www.siemens.com/MAGNETOM-World)**Source Signal Imaging, Inc.****Booth #19**

2323 Broadway, Suite 102  
San Diego, CA 92102-1946 USA  
Phone: 1-619-234-9935

Fax: 1-619-234-9934

EMSE® Suite is a set of software tools for the study of brain dynamics measured by EEG/ERP or MEG, combined with MRI and fMRI. The modular architecture permits users to purchase only those tools required for their research. Visit us at [www.sourcesignal.com](http://www.sourcesignal.com) and download a fully working version of evaluation.

**Wiley****Booth #34**

111 River Street  
Hoboken, NJ 07030-5774  
Phone: 1-201-748-6000

Fax: 1-201-748-6617

John Wiley & Sons is an independent, global publisher of scientific, technical, and medical books, journals, laboratory manuals, and electronic products. *Human Brain Mapping*, our featured journal, is available to OHBM members at a special discount subscription price of just \$99. The subscription includes both print and online editions.

## ACKNOWLEDGMENTS

**The Organization for Human Brain Mapping  
thanks the following companies  
for their generous financial support  
of the HBM 2004 Program:**

Titanium Level (\$30,000)

GE Healthcare  
Philips Medical Systems  
Siemens Aktiengesellschaft Medical Solutions

Gold Level (\$20,000)

Elsevier

Silver Level (\$10,000)

Gedeon Richter Ltd.  
Talentis Programme—Hungary

Bronze Level (\$5,000)

Pfizer

Other

Special thanks to the  
National Institutes of Health  
for providing funds  
for the Travel Award Program  
and  
John Wiley and Sons  
for providing funds  
for the Young Investigator Award

## **Executive Office**

Suite 204, 5841 Cedar Lake Road  
Minneapolis, MN 55416, USA
